SUMMARY

Full-stack developer (React.js, Node.js, PostgreSQL) with 1+ year of production experience delivering REST APIs, real-time features, and secure authentication. Currently exploring MCP and prompt engineering to build AI-powered applications.

PROFESSIONAL EXPERIENCE

Faspi Enterprises, *Junior Software Developer* 05/2025 – 05/2026 | Noida

- Built and maintained full-stack features using React.js (frontend) and Node.js/Express (backend), contributing to a production application used by real customers.
- Designed and integrated RESTful APIs with a cron-based scheduler to trigger real-time push notifications, reducing manual follow-up overhead for the ops team.
- Optimized complex PostgreSQL queries, resulting in measurable improvements in API response time and reduced server load during peak traffic.
- Implemented end-to-end JWT authentication with route-level protection, securing all private API endpoints.

EDUCATION

CMR Institute of Technology, 12/2020 – 05/2024 | Bangalore
Bachelor of Engineering — Computer Science (7.54)

SKILLS

Frontend (React.js, JavaScript (ES6+), Tailwind CSS, HTML5, Responsive Design) | **Backend** (Node.js, Express.js, REST APIs, WebSocket, JWT Authentication, Cron Jobs) | **Database** (PostgreSQL, SQL Query Optimization) | **Tools** (Git, GitHub, VS Code, npm) | **Languages** (Java, JavaScript)

LANGUAGES

English | Hindi -

PROJECTS

Job Application Tracker

- Built a full-stack job application tracker with a React.js frontend and Node.js/Express backend — deployed live on Vercel and Railway with full CRUD, pagination, search, and status filtering.
- Implemented status history tracking logging every application stage change (applied to interview to offer) with timestamps, and a stats dashboard showing breakdown and monthly trend charts.
- Integrated Redis caching on high-frequency GET queries and Redis-based rate limiting (100 req/15min), with JWT authentication and role-based access ensuring users only access their own data.
